

(a) Local vs. global budget allocation

Necessary: $\text{budget_exceeded} \Rightarrow \Sigma a_i > B$

(recall = 1.0, precision = 0.533)

(b) Confusion matrix (n = 350)

	Observed: No BE	Observed: BE
Pred. feasible	TN = 76	FN = 0
Pred. infeasible	FP = 128	TP = 146

$$\text{Precision} = \frac{146}{274} = 0.533$$

$$\text{Recall} = \frac{146}{146} = 1.000$$

$\Sigma a_i > B$ is necessary but not sufficient for BE
